

## FRONT ACCESS RAMP & ENABLING WORKS

### Details

**Project:** Queens Road    **Start:** June 2021    **Value:** £10,000

**Employer:** Newham Council    **Completion:** June 2021

### Project Details

KBH Building Services Ltd were awarded this project following tender submission. It was reported to us that the current brick work and concrete ramp was not wide enough to allow good access and egress in time of an emergency. We removed the old ramp and laid a new 100mm concrete path layer where the original ramp footprint was to secure the surface. That ramp needed full demolition and concreting. Once this was set, we installed the new semi-permanent ramp.
